

Inspirational Service Supported By A Local Branch Infrastructure

The name Windsor has been synonymous with materials handling and access systems since 1977, providing a first class range of materials handling and access equipment hire, sales and maintenance services.

Through a mixture of originality, entrepreneurial spirit and determination, we have developed into one of the largest and most innovative suppliers in the UK.

We understand local business, because we are one. Currently operating from eleven branches across the country, we pride ourselves on our commitment to the local community and our personable approach.

When you contact us, you're talking to local experts in both sales and service, with great knowledge of your area. And it's this long-established ethos that's helped us develop and retain some of our oldest clients.

We maintain a philosophy of continual investment – constantly adapting and evolving our business to meet the needs of the modern equipment user. This ensures our strong belief of local expertise and customer support is maintained, alongside a large and reliable hire fleet.

Through clear, defined goals we work hard not only to improve our business but to significantly increase the reputation of our clients, through the provision of efficient and reliable products.

We have hundreds of forklifts and access platforms in our hire fleet, and when renting any of these machines, all servicing, breakdowns and preventative maintenance is included. Should a fault occur that can't be rectified, then a loan machine will be provided to you – free of charge.

Whether you're a one-truck or a fleet operator, hire, sales, or service customer, we are with you every step of the way, to help you achieve more.

Windsor Materials Handling

Birmingham - Chelmsford - East Kilbride - Hull (Head Office)
Immingham - Nottingham - Peterborough - Sleaford
Slough - St Helens - Wakefield - Washington
